  Completed Software Engineering Comptency Test with Score 90
- Introduction To Python - Sololearn | 2026
  Completed Course
- RPL Competency Multiplatfrom Web Test - SMK Taruna Bhakti | 2026
  Completed Software Engineering Comptency Test with Score 88

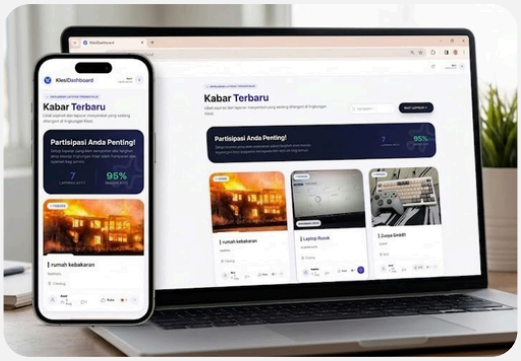

Project Portofolio

KlesiChat Web

A personal web-based chat platform built with React and Supabase. Features real-time private messaging, voice notes, and a responsive dark/light mode UI.

Github See More >>

KlesiService

KlesiService is a community complaint management web application designed to simplify the process of reporting public issues. Users can submit complaints, upload supporting evidence, monitor report status, and receive updates, while administrators can review, verify, and manage reports through an intuitive dashboard.

Github

Panchiko

Panchiko Library

Panchiko Library is a library management web application with Next.js that helps organize book inventories and streamline borrowing processes. The system features role-based access with Admin and User accounts. Admins can manage books, categories, and loan records, while users can search for books, view availability, and submit borrowing requests.
